What's the difference in Proof Quality and Uncirculated Quality Coins?

American Eagle Proof Coins are made from highly polished planchets and dies and are struck more than once to accent the design. Proof coins receive the highest quality strike possible and are distinguishable by their mirror-like background and frosted foreground. American Eagle Uncirculated Coins are struck on specially burnished planchets and feature a matte, or satin-like finish.

Due to the volatility of the precious metals market, prices are subject to change. Please visit our Web site or call for pricing and to place your order.
